

## Instruction of installing the M7 MTP driver

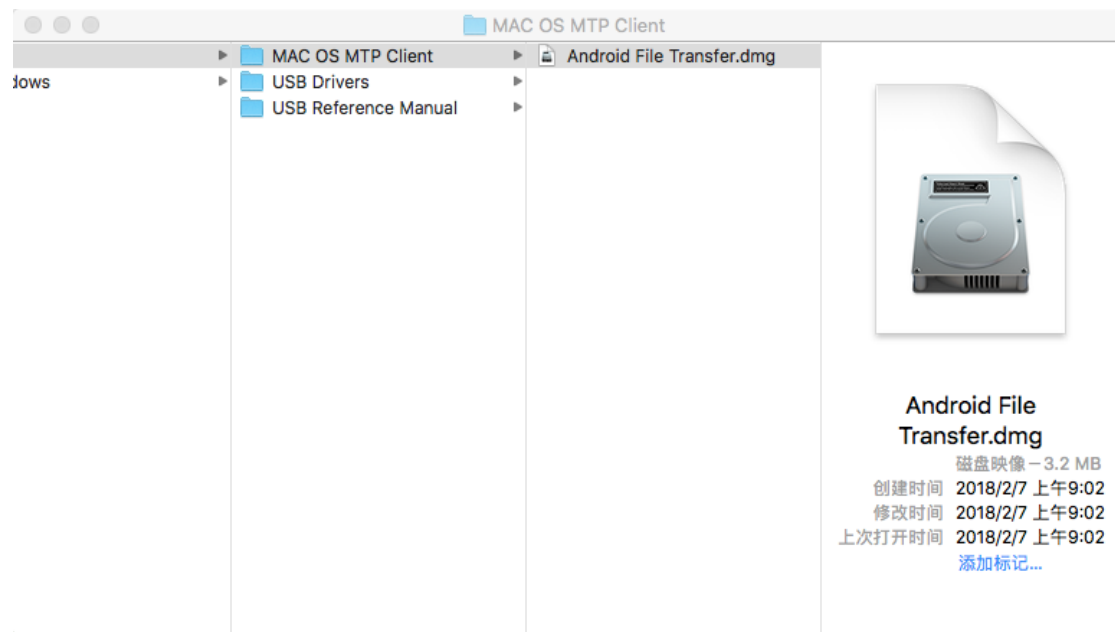

1. Connect the M7 to the Mac computer with a Type C to Micro USB cable, and then you'll find a folder "NO NAME" emerged on the desktop.

2. Double click to enter the emerged folder.
3. Double click to enter the sub-folder "Mac".

4. Copy the "Android File Transfer.dmg" file under the "MAC OS MTP Client" sub-folder to the desktop.

5. Drag the "Android File Transfer" file to the "Applications"

6. Enter "Applications", and double click the "Android File Transfer". Then you can manage the files stored on the M7 internal storage or the Micro SD card.
